Nomad Technics completes a scheduled maintenance and modifications on a Boeing BBJ

Basel, 30 January 2023 - Nomad Technics has successfully completed a scheduled maintenance and modifications on a Boeing BBJ.

The company performed scheduled maintenance tasks on the Boeing BBJ and at the same time completed a number of modifications on aircraft systems. These included the installation of a Quick Access Recorder, the replacement of a water heater with a different, more efficient unit and the relocation of an infrared sensor. All of these modifications were accomplished through custom design and engineering resulting in EASA modifications approval. They all add to an increased operational efficiency and an enhanced passenger experience. To further freshen-up the appearance of the aircraft's cabin Nomad Technics' engineers and mechanics refurbished seat and credenza leather items and touched-up the woodwork of cabinets and furniture. The aircraft was handed-over at the agreed ground-time to a fully satisfied customer.

"We are proud that the flexibility and dedication shown by our team allowed us to incorporate these modifications during the scheduled maintenance work thus not extending the agreed ground time planned for the event", says Christian Sacker, the company's Director Quality, Safety & Compliance. Thomas Gierlich, Director Maintenance Sales of Nomad Technics, adds: "Besides the maintenance and modifications work performed on the aircraft, the cabin team did an amazing job to freshen-up the aircraft's interior."

About Nomad Technics AG:

Nomad Technics AG, the maintenance division of Nomad Aviation AG based in Basel/Switzerland, is an EASA Part-145 approved organization (Approval No. CH.145.0386) and provides maintenance inspection and non-routine repair work on Bombardier Challenger 300, 604, 850 series, Bombardier Global XRS, Global 5000, Global 6000 and Embraer Legacy 600 and 650 business jets as well as line and base maintenance work on the Airbus A320 family and Boeing 737NG series.

The company occupies its own 5'100 m2 hangar together with 6'800 m2 of additional ramp space at the International EuroAirport in Basel / Switzerland. In addition to maintenance the company provides hangarage and parking services for aircraft up to the size of the Airbus A320 family and Boeing 737 series.

About Nomad Aviation:

Nomad Aviation AG, based in Switzerland, offers Aircraft Management and Charter services. The company operates an exclusive fleet of aircraft out of its corporate offices in Zurich-Kloten, Switzerland and in Sliema, Malta.
