Nomad Technics replaces carpet on a Bombardier Global XRS.

Basel, Switzerland, September 28, 2020 - Nomad Technics has installed a new carpet throughout the entire cabin of a Bombardier Global XRS business jet which has been serviced at the company's Basel facility during the Covid-19 pandemic.

Nomad Technics carried out a defect rectification on the Global XRS. Just before the aircraft was ready to depart the owner decided to extend his vacation in Switzerland. He asked to do additional work such as replacing the cabin's carpet which had been ordered several months ago but was never installed as there was no ground-time available to perform the job. Immediately the company's interior experts teamed up with the finest provider for carpets and cabin components on Friday afternoon and the job was scheduled within a few hours to start on Monday morning. The work included the shipment of the carpet to Basel, the removal of the old carpet, seats, sofas, tables and cabinets and the installation of the new interior in just one week. The team handed over the aircraft to a very satisfied customer.

„We are excited that our team made it happen very quickly to please a customer“, says Estelle Thorin, Director Sales & Project Management at Nomad Technics. „We are able to enhance the cabin's appearance with the greatest care for details even under unexpected circumstances“, adds Roman Hug, VP/General Manager of Nomad Technics.

About Nomad Technics AG:

Nomad Technics AG, the maintenance division of Nomad Aviation AG based in Basel/Switzerland, is an EASA Part-145 approved organization (Approval No. CH.145.0386) and provides maintenance inspection and non-routine repair work on Bombardier Challenger 300, 600, 850 series, Bombardier Global XRS, Global 5000, Global 6000 and Embraer Legacy 600 and 650 and Cessna's C525 series aircraft as well as line maintenance work on the Airbus A320 family. The company occupies its own 7'400 m2 hangar together with 7'000 m2 of additional ramp space at the International EuroAirport in Basel, Switzerland. In addition to maintenance the company provides hangarage and parking services for aircraft up to the size of the Airbus A320 family and Boeing 737 series. Disinfection of any type of business jets is also on offer.
