Nomad Technics performs C-check on a Boeing BBJ

Basel / Switzerland, March 10, 2025 - Nomad Technics has recently completed a C-check on a Boeing BBJ aircraft.

Nomad Technics at its Basel/Switzerland facility has undertaken this large maintenance event on the Boeing BBJ which saw a thorough examination of the aircraft's primary and secondary structures during the scheduled inspection. For this purpose the entire cabin was removed. The work included also the landing gear overhaul, the implementation of Service Bulletins and Airworthiness Directives as well as defect rectification on aircraft systems, structural components and interior items. A partial cabin refurbishment was performed to improve the passenger's experience during flight. In addition a new carpet was installed throughout the entire cabin and customized modifications were applied to the in-flight entertainment system. Functional and operational tests of all aircraft systems concluded the maintenance job. The aircraft was returned to the very satisfied long time customer on time.

„The successful completion of this demanding C-check on the Boeing BBJ is another great achievement for Nomad Technics and will enable us to further enhance our capabilities and to execute maintenance services not only on Boeing but also on a variety of other aircraft types“, says Christophe Haeffelin, Director of Operations of Nomad Technics. Thomas Gierlich, Nomad Technics' CEO adds: „We are very proud of our Boeing maintenance team and the entire organization behind it who have been performing extremely well. It will be our great pleasure to welcome owners and operators of Boeing aircraft at our Basel/Switzerland facility to demonstrate our highly skilled VVIP aircraft maintenance, refurbishment and bespoke aviation services.“
