### MEDIA RELEASE

#### **Nomad Technics completes maintenance and cabin refurbishment on Challenger 650**

Basel, December 23, 2025 - Nomad Technics has recently redelivered a Bombardier Challenger 650 after extensive maintenance. The aircraft was brought back to airworthiness after a long period of parking. The workscope far exceeded a standard maintenance project and included the complete overhaul of both engines, a 48 month inspection and an additional package of thorough inspections and tests, tailored to this aircraft's particular situation. Additionally, Nomad Technics gave the cabin a fresh look with newly upholstered seats, a new carpet and repairs of various damages of the woodwork.

"It was a challenging and very interesting project. The trustful cooperation with the aircraft operator allowed us to make it a great success for everyone involved. We are proud to see the aircraft back in the air again, especially with its beautiful new cabin.", says Brigita Vildžiūnienė, allowed us to perform exceptionally well on this project that was well beyond routine maintenance. We are grateful to have received this opportunity by our trusted customer", adds Thomas Gierlich, CEO of Nomad Technics.

#### About Nomad Aviation:
